SUMMARY

Software engineer specialized in full-stack web development focus on Next.js and TypeScript, building end-to-end applications with type-safe APIs, modern React UIs, and performance-first rendering. Passionate about clean, maintainable code and shipping reliable products.

PROFESSIONAL EXPERIENCE

Software Engineer/Full-Stack Web Developer 2025 – 2026
self-employed
2025: Natours, tour booking platform. Built a full back-end with Node.js, Express.js, MongoDB and Mongoose following the MVC architecture. Integrated Stripe payments for secure tour bookings, rendered server-side views with Pug.js and styled the interface with Sass.
2026: QAF Coffee, full e-commerce app. Developed a complete coffee store with Next.js and TypeScript, authentication with Better Auth, and a PostgreSQL database hosted on Supabase. Covered the code with automated tests using Vitest and built a responsive UI with modern CSS and Tailwind.
2026: AI-assisted development. Fluent at working with AI coding agents like Claude: using memory, subagents and skills, and managing the context window well to ship features faster without losing code quality.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science 2022 – 2026 | Ismailia, Egypt
